Experience

UX Design Intern

PixelPandas | August 2025 - November 2025

- Led UX design for 5+ active SaaS, B2B, EdTech, and FinTech platforms — designing user journeys, wireframes, and responsive layouts that improved measurable task completion rates across client products.
- Built and maintained a scalable Figma design system and component library, reducing design-to-development handoff time by ~30% and ensuring brand consistency.
- Simplified critical user paths by conducting card sorting and heuristic evaluations across 3+ products, streamlining information architectures and reducing navigation depth.
- Collaborated cross-functionally with engineering and product teams to deliver WCAG AA-compliant interfaces across all shipped designs.

Projects

Synapse Teams - synapse-teams.vercel.app

Visual Team Intelligence SaaS | React, TypeScript, Tailwind CSS, Framer Motion

- Led end-to-end UX and frontend for a distributed team platform — unified workspace centralizing onboarding tracking, escalation matrices, and productivity graphs on an interactive canvas.
- Built fully responsive frontend with 60fps micro-interactions; live product referenced as portfolio piece by 3+ design peers.
- Optimized visual hierarchy and reduced context-switching through intentional component design and interaction patterns.

PulseFlow

Operations Intelligence Platform | React, TypeScript, CSS Grid, Chart.js

- Led UX for an operations dashboard enabling real-time visibility into high-volume workflows, with severity matrices and SLA countdown timers to surface critical escalations instantly.
- Built responsive data-visualization widgets and dashboards; teams identified critical issues ~40% faster versus static reporting.

YoAgshala

Personalized Yoga Recommendation Platform | HTML, CSS, JavaScript, Django, Python

- Designed a multi-step diagnostic wizard to reduce cognitive load and increase conversion, achieving ~65% wizard completion rate in user testing.
- Developed full frontend UI and personalized recommendation logic, rendering yoga routines based on user-selected health pain points.

Hover Zoom Image

Interactive Media Experience | HTML5, CSS3, JavaScript (ES6)

- Designed smooth zoom animations with custom mouse-tracking hover overlays to mimic tactile product inspection, improving buying confidence.

Education

University Institute of Technology (UIT), RGPV

B.Tech in Automobile Engineering | 2022 - 2026 | CGPA: 7.23/10

Engineering background developed strong systems thinking and structured problem-solving that directly informs my approach to UX and product design.

Skills

Design

User Experience (UX) Design · User Interface (UI) Design · Interaction Design · User Flows · Wireframing · Prototyping · Low/High-Fidelity Design · Responsive Design · Component-Based Design · Design Systems · Typography · Color Theory · Visual Hierarchy · Layout & Grid Systems

Research & Strategy

User Research · Usability Testing · Information Architecture · Journey Mapping · Competitor Analysis · Heuristic Evaluation · Card Sorting · Design Thinking · Accessibility (WCAG AA) · UX Audits

Frontend Development

HTML5 · CSS3 · JavaScript (ES6) · React · TypeScript · Tailwind CSS · Framer Motion · Java · Python · Django

Tools

Figma (Advanced) · Git · GitHub · VS Code · Overleaf · LaTeX

Other Skills

Cross-functional Collaboration · Customer Onboarding · KPI Monitoring · Problem-solving · Human-centered Approach

Language

English (Professional Working Proficiency), Hindi (Native)

Leadership & Volunteer Experience

UI Designer & Volunteer

Google Developer Student Clubs - UIT RGPV | February 2024

- Designed the official event landing page and all visual assets for a UX Meetup supporting 120+ attendees; coordinated with GDSC organizers for brand alignment and on-time delivery.
